The Miru 1day Menicon Flat Pack is indicated for daily wear, severe, gritty or burning sensation. If any of the following conditions exist:

- Acute and subacute inflammation or infection of the anterior chamber of the eye.
- Acute and subacute iritis may be present. KEEP THE LENS OFF THE EYE AND IMMEDIATELY CONTACT YOUR EYE CARE PRAC TITIONER OR 911. AVOID SELF TREATMENT.

- Avoid all harmful or irritating vapors and fumes while wearing contact lenses. Do not wear the Miru 1day Menicon Flat Pack when working with chemicals or in environments with potential irritation to your contact lenses.

- Do not touch the lens with your fingernails. Use only your fingertips. Do not touch the lens with any foreign substances, oils, products, or creams.

- Do not wash your hands with soap or alcohol-free products. Use cold water to rinse your hands.

- Always wash, rinse, and dry hands before wearing contact lenses. Always avoid touching your lens with your fingernails. Use only your fingertips.

- If you or anyone in your family have a fever or cold symptoms, do not wear any contact lenses.

- If you or anyone in your family has a recent history of eye infection or irritation, do not wear any contact lenses.

- If any of the following symptoms persist, contact your eye care practitioner:
  - Eye redness or irritation
  - Foreign body sensation in the eye
  - Dryness
  - Pain
  - Blurred vision
  - Halos around objects

- If your vision is blurry, the lens is not properly centered or the lens has not turned inside out. To check this, look into a mirror and note if the lens is reflected back in the same direction.

- The decision to be fit with monovision correction is individual. It is important to discuss this with your eye care practitioner. Some patients have experienced difficulty adapting to monovision correction. If you find yourself still is blurry after changing both lenses and consulting your eye care practitioner, you may want to discuss with your eye care practitioner before attempting to use lenses that have not been fitted for monovision.

- It is recommended that you only drive with monovision lenses prescribed so that both eyes are corrected for near vision in straight ahead and upward gaze that is indicated for daily wear. If you find this method difficult, your eye care practitioner will provide additional information.

- The Miru 1day Menicon Flat Pack is designed to be a Daily Disposable Soft Contact Lens. It is recommended that you follow your eye care practitioner’s directions for follow up examinations. Keep all appointments scheduled by your eye care practitioner for monitoring your vision and eye health.

- The Miru 1day Menicon Flat Pack is fabricated in the USA and is safe to wear during sleep; therefore remove your contact lenses before going to sleep. Wearing contact lenses at bedtime can result in serious eye damage. Some patients have experienced difficulty adapting to monovision correction.
